

**KENMURE ARCHITECTURAL REVIEW COMMITTEE (AN OPERATING COMMITTEE OF)
KENMURE PROPERTY OWNERS ASSOCIATION**

Instructions and Approval Form for Awning Installations

Since outside decks are often severely exposed to direct sun and heavy rainfall, awning protection is permissible subject to these conditions:

1. Material shall be a cloth type fabric. Aluminum or vinyl is not acceptable.
2. Color shall blend with exterior color of the house or condominium.
3. Awnings only over swinging doorways or windows are not acceptable (must be over all or most of deck).
4. Awnings must maintain the present elevation profile and not extend more than 12" beyond existing deck structure.
5. Retractable awnings, if practical, are recommended.
6. Approval is contingent upon the Owner's proper maintenance of the awnings as to fading, wear, & tear.

Submit with this application a floor plan showing the location of the proposed awning. Include a sample of the awning material, showing color & quality. Attach a photograph of the side of the house, condominium, villa, or cottage where the awning is to be installed.

On receipt of this application and required submittals, the KARC will review same and give its decision for final action.
